This beautiful architect house is located in Le Vesinet specific environment and was built in 2002. It provides comfortable appointments and amenities and is energy-efficient thanks to (among other things) an underfloor geothermal heating. The garden level opens onto a roomy entrance, a large living-room (a fireplace insert amidst) with direct access to a swimming-pool and a garden, a dining-room and a bright eat-in kitchen. On the same level with separate access : an apartment of about 51sqm comprising a living-room looking onto an open-plan kitchen with a dining area and a large bedroom with shower-room. The upper floor accommodates a large landing (with a billiard at the present time), a master suite with walk-in closet and bathrooms, four further bedrooms and bathroom/shower rooms. Spacious basement of 160sqm. In the garden, an outbuilding shelters a fitness room opening onto an outdoor swimming-pool (8m x 4 m) and a large double garage. A walking distance from RER A station (7 minutes) and a 20 minute-drive from Paris
